Undertaking for SMS to registered Subscribers (as per TRAI Regulations)

This agreement ("Agreement") is made and entered into on 29th June 2015 ("Execution Date") by and between:

- 1. K.S. Institute of Technology, Bangalore AND
- 2. Thoughtnet Technologies (India) Pvt. Ltd

We hereby undertake that:

- 1. K.S. Institute of Technology represents The Principal and Staff who are using PupilPod software.
- We have subscribed to send transactional SMS through Pupilpod, under the "Registered Educational Institute" category and will be sending messages to our parents/guardians/students/staff only and relating to the institution only.
- 3. We shall make a continuous effort to strictly comply with the applicable Telecom Regulatory Authority of India rules and regulations ("TRAI Regulations") in force including but not limited to regulations applicable for the National Customer Preference Registry ("NCPR") commercial communications and for the content of the SMS Messages.
- We shall strictly comply with TRAI Regulations applicable to the SMS Messages as stated in the below points.
 - a) Any virus and malicious code that might disrupt, disable, harm, erase memory of, or otherwise impede operations, or functions of any software, hardware, wireless device, computer or any network.
 - b) Any vulgar, obscene content, adverse, offensive / derogatory reference to (i) corporations or brands; (ii) any personality, living or dead; (iii) communities, living or extinct; (iv)to any city, building, geographical feature, etc. that can be singularly / uniquely identified in the world; (v) gender and (vi) physical / racial attributes.
 - c) Any content, which is lascivious or appeals to the prurient interest or the effect whereof, is such as to tend to deprave or corrupt any person.
 - d) Any content, the presentation, dissemination or disclosure whereof, infringes any intellectual property right or confidentiality obligation.
 - e) Any content which declares to be opposed to standards of morality or decency, or to be opposed to public policy or any adverse, offensive / derogatory reference to any companies, organizations, religious associations, political parties, governments (state and central), anyone's private life, any other commercial and non-commercial entities.

Date: 08-08-2013

To, The Secretary Kamavarisangam Bangalore

Dear Sir,

Sub: - Proposal for Manvish Web enabled Campus Automation systems

We are glad to submit the proposal for supplying, installing and commissioning of biometric based attendance management system for K S Group of Institutions. We hope that the systems are in line with your requirements.

Thanking You,

For Manvish eTech Private Limited

Supreeth Prakash

Asst. Manager, Operations

Table of Contents:

- 1. Introduction
- 2. Advantages of MiFaun Biometric Devices over other conventional Biometric devices
- 3. Deployment scenario in K S GROUP OF INSTITUTIONS
- 4. Technical Specification of a MiFaun Device
- 5. Server software features
- 6. Investment Schedule
- 7. Roles & Responsibility & Implementation Process
- 8. Training, Installation & Support
- 9. General Terms and Conditions
- 10. About Manvish eTech Pvt Ltd
- 11. References

1. Introduction:

Finger print is a distinct identification for EVERY person. It is universal, and since decades finger print is used for authentication during verification.

MiFaun-Workforce management system is an embedded Biometric application for authentication, time attendance monitoring.

Biometrics links events to individuals. This is convenient, accurate, and is socially accepted.

MiFaun is a secure access system and comes with feature rich web enabled software.

It supports User ID with password and Finger print or smart card during verification for access control.

Radio-frequency identification (RFID) (optional) is the use of a wireless non-contact system that uses radio-frequency electromagnetic fields to transfer data from a tag attached to an object, for the purposes of automatic identification.

The mifaun biometric attendance system can be integrated to SIS. (Optional)

2. The numerous advantages of MiFaun biometric devices over other conventional biometric devices in the market are as follows:

- User friendly color LCD display, option to display color photographs of the Employees:
 Unlike ordinary biometric devices, which displays single line monochrome display, MiFaun devices can display color photographs, which gives a better feel to the user.
- 2) IP enabled, directly connects to the internet without the need of a local PC: This gives the advantage of connecting the devices directly to the internet without the need of a PC or any other media in between, therefore any scope for tampering the data is ruled out, data will be secure and the entire system will be tamper proof.
- All the devices can be connected to the central server through GPRS / WIFI / LAN, and can be monitored remotely:
 In an ordinary biometric device, direct connection between the devices and the central server is not possible without a local PC, but in MiFaun device, remote connectivity to the central server is possible through various means of communication like GPRS / WIFI / LAN.
- 4) Automatic synchronization with the central server: MiFaun devices are connected to the central server and the devices are synchronized automatically. For every fixed interval of time, the data captured on the MiFaun device will be automatically pushed into the central server. Therefore the end user/decision making authority can see the data on a real time basis. Even if the internet connection is down, the data will be stored in the device memory, and will be pushed to the central server automatically when the connection resumes.

S) Reports can be seen by the authority from anywhere in the world:

The data captured and reports generated can be seen/monitored by the concerned authority from anywhere in the world. The data can be seen just by logging into a website.

6) Data encryption:

The data captured is encrypted using secure algorithm; hence there will be no scope for data interpretation in between the devices and server. This wipes out any room for data manipulation.

7) Large memory capacity:

MiFaun devices comes with large storage capacity, expandable up to 2GB, therefore months of transactions can be stored in the device.

8) 16 keys alpha numeric mobile type keypad:

This enables the users to type in their ID with convenience. Unlike other ordinary biometric devices which are only number based, MiFaun comes with an alpha numeric keypad, therefore both names and numbers can be typed with ease.

9) Menu driven:

Unlike ordinary biometric devices MiFaun biometric devices has a large color LCD display, it is user friendly and menu driven. Whereas other biometric devices depends on function keys, in which functions/policies are limited to the number of function keys present in the device.

10) Excellent Battery backup:

MiFaun devices has an inbuilt rechargeable lithium battery, this can provide backup up to 8 hours. When the power goes, the device operates on the inbuilt battery backup. The battery charges automatically when the power resumes.

11) Regional Language Support:

MiFaun Biometric Device supports Regional Indian Language Kannada. This enables the people of all categories to read the contents in the display screen.

12) Flexible Shift Operation:

MiFaun Biometric Device can operate in flexible shift timings. This enables the organization to

13) Flexible Overtime Calculation:

Mifaun Biometric device can provide overtime calculations, if required with round off option.

14) Employee Leave Configuration:

Mifaun Biometric device software comes with default leave configuration module which enables you to schedule leaves and OOD of each employee in your organization.

15) Payroll Report:

The above mentioned features enable the software to provide a final payroll report mentioning important details such as number of days present, PL, CL, SL etc for the current month. The report is intended to be uploaded to the company's payroll package.

16) Cost Effective:

With our vast experience in the field of embedded system for more than a decade we have our own in house design, manufacturing, assembly infrastructure and manpower. We are the original equipment manufacturers of the product we deliver (made in India), this provides our customer great value for money in terms of technology. This eliminates any third party or related commercial escalations to the cost of product and services.

17) Software:

We have the core competence to provide software's for our entire product line and can customize it to client's requirements within the scope of the project. We ensure the continuity of the software life cycle with regular support and updates.

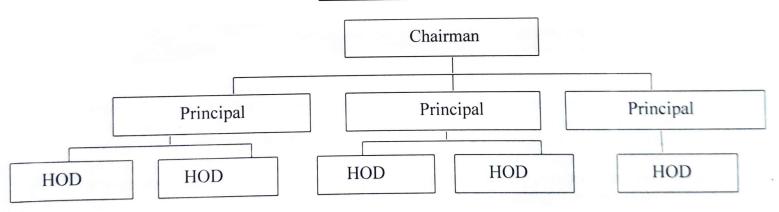

18) Web Enabled Application:

With the provision of static IP to the server the software can be launched on to the internet medium. Concerned managers can access reports on a daily basis through internet irrespective of the location.

19) Hierarchal Architecture for abstraction of information:

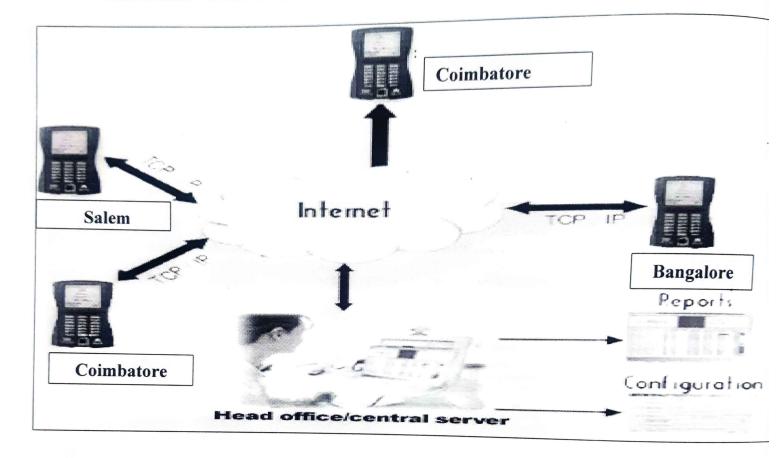

The software architecture allows the data to be accessed only by the concerned person. The hierarchal structure helps in dividing the work of monitoring the report at various levels.

Hierarchal Structure:

3. Deployment scenario for K S GROUP OF INSTITUTIONS:

The Offices are located in the remote locations anywhere in India; MiFaun biometric devices are installed in every office or ward. These devices are connected to the central server via GPRS or TCP/IP Connection, as applicable. The data captured on every device will be sent to the central server, and the same can be seen over the internet. The reports can be seen over the internet by different concerned person. Since the devices are directly connected to the central server there is no room for tampering the data in between.

4. Technical specifications of the MiFaun Biometric device

Descriptions	Specification				
CPU	32 Bit RISC CPU				
Storage memory	up to 2GB				
Memory	128 MB RAM (Upgradable)				
Template capacity	50,000 expandable up to 100,000. Option to capture any number of Fingerprint per person				
Sensor	500dpi Optical Sensor with Scratch Resistance				

Matching speed: >FRR/FAR: 0.1% / 0.001				
Identification	Less than 2 seconds			
identification	1:1 and 1: N:			
Indicators				
	Low battery, Battery full, Power on			
Display	TFT Color Graphics LCD screen			
	Options to display Employee Photograph in color			
Connectivity	10/100Mbps, LAN/WAN, Internet			
Web features	IP enabled direct interface to Internet without PC			
	Directly connects to internet without PC			
Keypad:	Mobile type alpha numeric keypad with Function keys			
Multi-lingual	Regional language like Tamil supported in the device			
Key Quantity:	Mobile Type Alphanumeric Keypad with Function keys / Arrow Keys			
Battery	Lithium-ion battery, chargeable, 8 hours Backup			
Multi Authentication mode	Biometrics only / Biometrics + Keypad / Keypad only			
Auto sync	Automatic sync with the central server, even if the communication			
	with the central server breaks data shall be transmitted automatically			
	when the communication resumes			
Remote Operation	Trouble Shooting & Remote Fingerprint template transfer			
Operation temperature	-5 to 55 degree Celsius			

5. Server Software features

This software will be running on the central server to synchronize the activities simultaneously with all the live MiFaun Biometric devices running on the network. Some of the major features/functionalities are

- Web-server System will be synchronized with MiFAUN.
- In the event of disruption of communication between MiFAUN device and webserver, data will be stored in the MiFAUN device until the first opportunity of communication is established upon which all accumulated data will be transmitted to the server.
- It is totally web enabled software accessible from anywhere through Internet using browser
- It supports multiple logins for administering the activities through Internet using login, password and/or biometric with the concept of dashboard with more than 5 different levels as defined from macro to micro operations
- It supports the communication through LAN, WAN, internet.
- It supports data migration to other application software and/or database

- It supports the continuity in data transfer between MiFAUN devices and server in case if any network failure for certain period (Data will not be lost)
- It supports data upload and download operations.
- Maintains data including person information, Fingerprints and Photographs.
- Data upload and download with MiFAUN device
- Configuration of data based on the area to download automatically to MiFAUN devices for authentication
- Day to day attendance upload and management of data from all MiFAUN devices
- Synchronization of data between web-Server and MiFaun devices
- Remote monitoring of MiFaun devices for their day to day functionality
- Remote configuration for controlling the devices (Like activate, deactivate, change time and clock, set operation time, disable operator, enable operator etc.,)
- Data integration facilities for Payroll or other legacy systems
- Automatic emailing of reports to concerned authorities, on schedule.
- Full-fledged, leave management, attendance policy management, shift management,. Etc.
- Supports transactional database interface
- The software is operational on Red Hat Linux OS in the server
- Customization of reports
- Reports can be exported to the following formats
 - Excel
 - PDF
 - MS-Word
 - o CSV
 - XML

6. Quotation:

SI	Item	Unit price (Rs.)
No:		
1.	Computer Terminal (Mifaun) Technical Specifications:	23,500
2.	Software: Server Mifaun software Mifaun handheld computing device application software	
3.	Project Implementation: Option 2 – Knowledge transfer, Training & installation in branch offices of K S GROUP OF INSTITUTIONS Installation of devices in respective branch offices Training on the device usage like registering fingerprint, configuring IP address. Training on software usage Sample finger print registration & photo capture	-

*Note: The above prices mentioned are exclusive of taxes.

Optional:

1. Inbuilt Camera:

Rs 2500

2. **GPRS**:

Rs 3000

3. Wifi:

Rs 2000

4. RFID:

Rs 1500

5. Thin RFID Cards: Rs 200/Piece

- Tag Holder
- Color Print
- Tag

Note: The above mentioned optional features costs are additional to the specified unit price and exclusive of tax.

7. Roles & Responsibilities and Implementation Process:

A. Implementation Process:

K S Group of Institutions shall provide the following: -

- 1. Quad -PROCESSOR SERVER WITH 8 GB RAM (2 No's)
- 2. 500 GB HDD (SCSI) or as appropriate
- 3. 10/100 Mbps Ethernet card
- 4. Back-Up hard disk of 500GB Preferably another system otherwise (For archiving & backup creations)
- 5. Windows Server OS / Red Hat OS
- 6. Web servers- JRUN ver 4.0 or latest
- 7. MySQL Database
- 8. Protection from virus and power outages
- 9. LAN / WAN with 10/100 mbps(to operate within campus)
- 10. Static IP (For internet access and web support to Manvish development team)
- 11. Printer (As applicable)
- 12. Web-Cam for photo-capture.
- 13. Uninterrupted power supply and virus protection for server
- Protection to the biometric devices.
- 15. Ensuring all the employees assemble at a point for fingerprint registration.
- 16. Provide employee data with relevant data fields like name, age, dob, address, etc.,
- 17. Ensure updated employee data are provided.
- 18. Provide all necessary information for the data and report generation.
- 19. Each branch/biometric device may have access to
 - Power supply
 - Broadband internet connection

SI.No	Work	Manvish eTech	K S GROUP OF INSTITUTIONS
1	Proposal Submission	YES – Prepared & submitted as per the solution requirements of K S GROUP OF INSTITUTIONS.	Inputs provided to Manvish eTech
2	Work Order Release & advance payment		YES – Work order shall be released as per the terms in proposal & mutual discussions.
3	Equipment Supply	YES – Shall be supplied as per the specifications mentioned in the Proposal	
4	Software-Hardware communication	YES-Shall be configured	YES-Shall assist Manvish eTech by providing IP address, network details etc.,
5	Employees Data Entry & Photo Upload	Shall upload data, data to be provided in the format specified	Data shall be provided in Excel / CSV format
6	Electric & LAN cabling		Shall be taken care by K S GROUP OF INSTITUTIONS
7	Finger print Capturing & Registration	Registration shall be done.	K S GROUP OF INSTITUTIONS shall assemble all its employees in a single location on a pre-decided date and location for registration.
8	Knowledge Transfer & Training	YES – KT will be done to the designated people	YES – Shall depute capable people for Knowledge transfer & training on the system usage.
9.	Point of Contact & Co- ordination	YES – Shall depute an Account Manager who shall be responsible for all co-ordination activities from Manvish eTech	YES – Shall depute a capable technical person who shall assist Manvish eTech in implementation, information & other co-ordination activities.

8. Training, Installation and support:

MIFAUN solution is designed in a manner that it is easy for operations and installation. Training on the entire solution will be provided at the time of installation to local in-charge, for one time.

Any support related issue will be addressed over through the remote desktop support. Biometric device support will be addressed through remote access facility from Coimbatore. Any problem beyond the rectification through the remote support, following actions can be taken place upon the directions from K S GROUP OF INSTITUTIONS: -

Malfunctioning devices can be brought back to the head office & a spare device can be dispatched in the meanwhile.

9. General terms and conditions of sale:

PART 1 - Services:

- 1. This quotation is valid for 30 days & applicable only for R V EDUCATION TRUST BANGALORE
- 2. Upon the release of Work order, R V EDUCATION TRUST BANGALORE will enter into an agreement also outlining the service levels, with Manvish eTech Pvt Ltd for a period of 3 years or more for the services mentioned as above.
- 3. Customization is limited to the reports.
- 4. Commercials for customizations anything other than the reports will be calculated as per the efforts involved.
- 5. Any applicable taxes shall be extra.
- 6. Purchase Order and payments may kindly be placed in the name of "Manvish eTech Pvt Ltd",#78, Elephant Rock Road, 5th Main Road, Jayanagar 3rd Block, Bangalore 560011
- 7. Services and time-lines.: Upon receipt of the PO Manvish eTech engineer will assess the nature and volume of work and provide the information needed with time-lines for operations.
- 8. This document shall be governed and construed in accordance with the laws of the Republic of India and shall come under the appropriate court laws in Bangalore city
- 9. All Government of India as well as international norms and licensing policies applicable to the sale of proprietary software is applicable to this agreement.

PART 2 - Hardware:

- 1. Device warranty: 1 year from the date of delivery
- 2. Payment mode: DD/Cheque/ e-Payment in the favour of Manvish eTech Pvt Ltd
- 3. Delivery: 4-6 weeks from the date of issue of P.O.
- 4. Warranty is not applicable for wearable parts like sensor and battery.
- $5.\ VAT\ /\ Service\ Tax\ /\ Any\ applicable\ taxes\ /\ cess\ /\ duties\ shall\ be\ applicable\ at\ the\ time\ of\ billing.$
- 6. R V EDUCATION TRUST BANGALORE shall provide necessary Electric points, LAN Points & related cabling works.
- 7. Payment terms:
- Hardware & Software: 50% Advance along with the work order & the balance upon the supply of the Hardware & Installation of the software
- Managed Services: Payable on a monthly basis, within 15 days from the date of receipt of

10. ABOUT MANVISH ETECH PVT LTD:

Manvish eTech Private Limited started operations in 1999 by technocrats who have been in the embedded engineering, networking and development field for the past 14 years.

As a focused embedded engineering company Manvish has pioneered several products in the embedded field such as multi-functional hand-held devices, remote diagnostics and webenabled internet-edge devices.

Manvish has also pioneered the concept of complete campus-wide ERP automation solutions for educational institutions in the year 2000 and have experience in design and handling very high data and user traffic securely, for over 6 years. Manvish also sets up complete lab infrastructure for industry and education for embedded systems training and development. Also as recognition of our in-house ability to design products, Freescale Semiconductors have awarded us a Design Alliance Partner status.

Manvish owns the IP rights of all its products

What are the benefits to you as a user?

- This implies that a high degree of customization with respect cost-volume-features, form factor and applications is possible.
- b. High reliability design and easy maintenance. Design incorporates remote diagnostics and application porting.
- c. Easy replacement.

Force Majeure Clauses: Due to circumstances beyond the control of Manvish, Manvish will be indemnified against any schedule lapses/delays etc., due to foreseen and unforeseen circumstances. In where it is possible to predict and anticipate foreseen delays Manvish will keep customer informed of the same. Manvish will not be held liable for any consequences arising out of inability of the customer to use, deploy the supplied goods.

K. S. INSTITUTE OF TECHNOLOGY

BANGALORE

Dtd.28.02.2020

Principal, KSIT BENGALURU.

Sir,

Sub: Request for procurement of 2 Nos. new face recognition biometric equipments.

This is to bring to your kind notice that we have purchased 3 Nos. thumb impression biometric devices from Manvish eTech Pvt Ltd vide Invoice No.45 dtd 29.10.2013 and installed in different locations at our college premises. Now, we are facing following problems as the same became old.

- 1) The thumb impressions are not being detected.
- 2) Unable to delete the resigned users ie., staff. As and when we take print-outs the old staff's details are being reflected in the monthly attendance report.
- 3) Frequently going out of order and resulting in missing of attendance of the staff.
- 4) Whenever we need the service / rectification of the equipments the supplier is not responding to our calls.

Therefore, we hereby propose to procure 2 Nos. new face recognition biometric devices at the earliest and replace with the existing equipments which may ease our problems to the maximum extent.

From,

Kumar K Assistant Professor, SPOC, ERP (Eduwize) Department of Computer Science & Engineering, K.S Institute of Technology, Bengaluru. 109

To,

The Principal, K.S Institute of Technology, Bengaluru.109

Respected Sir,

Subject: Request letter to release Advance amount for ERP implementation

This is regarding the payment request -as per your direction, the pilot project on ERP for 3 months. The estimation cost per student is stated as Rs.85.

Approximate students 1700 x Rupees. 85/- = 1,44,500/- Rupees, which charges nearly 12,000/per month. As it is quoted for 3 month pilot run, the cost estimation is around 36,000/- rupees.

We can initiate the trial run by processing 50% i,e 18,000/- of fees towards Vaishnavi Systems and Solutions, Bengaluru (Eduwize).

I Kindly request you to do the needful for the same.

Thanking You.

Yours Sincerely-

Hanking You. 23
