**DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING**

**Skill Development Training Program**

*on*

**“IOT EDGE AND NODE GATEWAY”**

**Date of Conduction: 30<sup>th</sup> October to 22<sup>nd</sup> November 2023**

**Venue: K.S Institute of Technology, Bengaluru**

**Time: 9:00 am to 4:00pm**

**Duration: 06 Hours**

**Sponsoring Bodies / Associating Organization: NIL**

**Name: Ms. Bhavani Sankari V**

**Designation: Trainer**

**Organization: Cranes Varsity**

**Profile:** Ms. Bhavani Sankari V a domain expert, corporate trainer in the field of Data Science and IoT having 5 years of Strong technical expertise in consulting and training. Expert in Data Science, Python, Machine Learning, Data Analysis and Visualization, Deep learning, and IoT. A Trainer has trained around 3500 Man hours of training experience and successfully trained around 1000 engineering graduates and working professionals in Linux and IoT. A Trainer is Proficient in working on Raspberry Pi, Arduino, Microcontrollers, IoT, Linux, and Device Drivers. A Trainer has conducted Successful Training on Basic and Advanced Level Python Programming, Python Unit Testing, IoT Edge Node & Gateway, Linux and device drivers etc

**Description of the Event:** The event began with the Trainer Ms. Bhavani Sankari V being welcomed by HoD of Artificial Intelligence and Machine Learning, Dr. Vijayalaxmi Mekali.

The Trainer Ms. Bhavani Sankari V, started the training with the basic fundamental concepts of IoT, Importance of IoT where participants were encouraged to come up with their own understanding. The Trainer discussed about the Technologies that makes IoT Possible. The Trainer later on gave an insight on examples of real time applications on IoT.

The Trainer gave description on the risks and the challenges involved in IoT and the future of IoT. The students were given an information on the types of the sensors used for developing an IoT Project. The Training on IoT skill development program was very helpful for the students. Students gained knowledge on IoT fundamentals, gave an idea for solving problems in IoT and to build projects on IoT and the students were encouraged to build their careers in these fields by adding a touch of innovation and novelty which could impact the society in a positive approach. Students were asked to find the ideas on project on IOT.

Students have formed a group of around 4 to 5 and came with the idea of IoT Project. Students have implemented the project on IOT and an IOT Exhibition was conducted on 1<sup>st</sup> December 2023 and gave presentation on the same. The list of the project is as follows.

Sl. No	IoT Projects Idea
1	Home Automation
2	Health Monitoring System
3	Gas Leak Detection
4	Visitors Counter
5	Home Security System
6	Smoke Detection
7	Smart Parking Automation
8	Smart Door Lock System
9	Wifi Rover
10	Smart Waste Management
11	Motion Detector
12	Automation for Smart Accessibility
13	Security Breach Alert System
14	Smart Irrigation System

**Objectives / Key Highlights:**

- To provide students an insight into solving problems on IoT.

- To encourage students to come up with the ideas for the given problem integrating IoT and AI.

**Participant details - No. of Participants: 67**

**Students (internal/external): Internal**

**Event Outcomes:**

EO#	EVENT OUTCOMES
EO1	Understanding the fundamentals of IoT Concepts and its components such as sensors, actuators, connectivity and data processing.
EO2	Understanding the applications of IoT in various domains like healthcare, agriculture, Industrial automation.
EO3	Develop skills to design and implement a basic IoT Project considering factors like cost, scalability and utility.

## **“SKILL DEVELOPMENT PROGRAM”**

**INTERNSHIP ON PYTHON AND IoT APPLICATIONS**

**Date of Conduction: 30th OCT to 22nd NOV 2023**

**Venue: KSIT CAMPUS**

**Time: 9:00 am to 3:30 pm**

**Sponsoring Bodies / Associating Organization: CRANES VARSITY**

### **Description of the Event:**

**It showed its wide range of application development and system development programming. Basically it gave us both practical experience and academic knowledge. Python being a comprehensive and versatile, high-level language it reduced the coding effort compared to other programming languages.**

### **Objectives / Key Highlights:**

**The objective of conducting a skill development program focused on Python and IoT (Internet of Things) applications encompasses several key goals:**

- **Technical Proficiency:** Equip students with a strong foundation in Python programming language, including its syntax, data structures, libraries, and best practices. Additionally, participants should gain practical experience in developing IoT applications using Python, integrating sensors, actuators, and communication protocols.
- **IoT Understanding:** This includes understanding the role of sensors, actuators, microcontrollers, communication protocols and IoT platforms in building connected systems.
- **Hands-on Experience:** Providing hands-on exercises, projects, and real-world simulations. Through practical application.
- **Problem Solving and Innovation:** Participants should learn how to identify IoT-related problems or opportunities and develop innovative solutions using Python programming.
- **Industry Relevance:** Alignment with industry trends, standards, and best practices in Python programming and IoT applications.

**Student details - No. of Students: 410 plus students**

**Students (internal/external): INTERNAL**

**Faculty: Dr. Rekha N, Mrs. Kavya B M, Mrs. Bhanumathi A**

**Photos: This includes the projects presented by the students and presenting it to the guide.**

## **OUTCOMES:**

**On day-1** Started with pre-assessment test and Python introduction and its history.

**On day-2** We were assigned to download and install Python and Setup path of variable ,running Python IDE and code execution

**On following days we learnt about:**

**IDENTIFIERS AND KEYWORDS**

**DATA TYPES AND OPERATORS**

1. Data types
2. Variables
3. Strings
4. Python Operator (Arithmetic , Relational , logical, bitwise, compound assignment, precedence of python operators)

**TUPLE AND LIST**

1. Accessing tuple/list values
2. Built in Operation
3. Built in Functions

## LOOPS AND CONDITIONAL STATEMENTS

1. Loops Definition and examples
2. Conditional Definition and examples

## FUNCTIONS AND ITS SYNTAX WITH EXAMPLES

(keyword arguments and arbitrary keyword arguments)

## MULTIPLE ASSIGNMENTS

## SORTING and SWAPPING

## RANGE FUNCTIONS

## NEGATIVE INDEXING

## SETS AND DICTIONARIES (Nested, loop, copy)

## LAMBDA FUNCTIONS (filter, map, reduce)

## Iot (Internet Of Things)

Python programming powers interfaced with effective Internet of Things (IoT) systems that are paramount in remote sensor networks, big data and data analysis, automation, and machine learning. IoT applications function efficiently with the help of Python **libraries/packages**.

Using variety of sensors coding to python several home automations, condition monitoring, smart manufacturing, infrastructure maintenance etc.

Such as:

- 1.ESP32-WROOM
2. LED Bank
3. LDR Sensor
4. IR Sensor
5. DHT11
- 6.Motion Sensor
7. Ultrasonic Sensor
8. LCD(I2C)
9. Servo Motor
10. Buzzer
- 11.DC Motor
- 12.0.96''OLED 128\*64 resolution
13. MFRC522 RFID Module
14. Moisture Sensor
15. Smoke Sensor
16. Membrane Keypad
17. 1-CH relay module

IEEE KSIT, WIE KSIT and SPS KSIT in association with the Department of Electronics and Communication organized an **IEEE Guest Lecture** on **07/06/2024**.

On the morning of June 7<sup>th</sup>, **Dr. KARTHIK N.RAO** delivered a compelling lecture at KSIT ECE SEMINAR HALL focusing on the critical theme of "Anti-Tobacco." The event was organized with the objective of raising awareness among students about the detrimental effects of tobacco use and advocating for a tobacco-free environment.

The event was graced by the Head of the Department of Electronics and Communication Engineering **Dr. PN Sudha**, **Mr. Santhosh Kumar B R** Branch Chair of IEEE KSIT SB, **Mrs. Bhargavi Ananth** Branch Counsellor of IEEE KSIT SB and **Mrs. Sangeetha V**, WIE mentor

The lecture began with an introduction by **SHANKARA CANCER HOSPITALS**, highlighting the significance of addressing tobacco consumption among youth and its profound impact on public health.

The doctor commenced by presenting alarming statistics related to tobacco addiction and its associated health risks, emphasizing the escalating prevalence of tobacco-related diseases and premature deaths globally. Through vivid illustrations and real-life examples, **Dr .KARTHIK N. RAO** underscored the physical, psychological, and socio-economic consequences of tobacco use.

Furthermore, doctors elucidated effective strategies for tobacco prevention and cessation, encouraging students to adopt healthier lifestyles and contribute to a smoke-free society. Practical advice and resources were shared to empower individuals in overcoming addiction and promoting sustainable health behaviors.

The interactive session concluded with a dynamic Q&A segment, during which students actively participated by seeking clarification and sharing personal perspectives on tobacco use. Speakers provided insightful responses, reinforcing key messages conveyed throughout the lecture.

Overall, presentation on "**Anti-Tobacco: Promoting Health and Well-being**" resonated deeply with the audience, inspiring students to prioritize their health and make informed choices regarding tobacco consumption. The event concluded with a sense of empowerment and determination among attendees to advocate for anti-tobacco initiatives within their communities

## Outcomes / Benefits:

1. Students gained awareness about the importance of women's health, including prevention, early detection, and holistic management of conditions like anemia, cervical cancer, breast cancer, PCOS, and PID during menstrual periods.
2. The session emphasized the significance of informed decision-making, education, and awareness in empowering students to prioritize their health and well-being in critical aspects of women's health.

**Place: Bangalore**

**Brief Profile about the Expert:**

Padmanaban has been working as the Software Enabling and Optimization Engineer in the Customer Experience Group at Intel PSG for the past 3 years. He is the academic ambassador for the Intel India FPGA University Program. Padmanaban has a postgraduate degree in Applied Electronics from Anna University, Chennai, and a Bachelor in EEE from GCT, Coimbatore. He has 16+ years of experience in digital design for both FPGA and ASIC. Prior to joining Intel, he worked as a Chief Faculty in Sandeepani School of VLSI design (Training division of CoreEL Technologies, Bangalore) for 8 years and as an Assistant Professor and Project Coordinator at Ramaiah University of Applied Sciences (RUAS) Bangalore for 5 years

## 1. Aim of the workshop

- 1). To make the students to understand about the Verilog Hardware Description Language (which is included as a part of Digital Design and Computer Organization (1BCS302) in the III semester).
- 2). To provide an interactive session with the industry people.
- 3). To create an aware of the importance of co-curricular activities in engineering domain

## 2. Abstract of the workshop session

Initially session dealt with the basic concepts of digital system design. Then the concepts of Verilog HDL were related with C Programming & complete details on Verilog HDL with examples were discussed.

## 3. Introduction to Basics of Digital System

The construction of different systems, the designs which are nothing but the specification of requirement, difference between small devices (like flip-flops) & large circuit (like microprocessors).

The hardware description languages are used to design the large & advanced circuit such as micro-controllers & microprocessors etc. The usage of the variable, constants & logics etc. in Verilog HDL are similar to C Language.

## 4. Design in Details

Design is the specification of requirement as discussed earlier. Design can be of different levels such as:

1. SwitchLevel
2. Register Transfer Level
3. Instruction Set Architecture Level etc.

For the design to check whether it is working or not A. Simulation & B. Synthesis is done.

### Description:

If the simulation is successful then the design is working & then it can be synthesized where the netlist is created. This netlist gives out the list of the components to be used.

### Design of Describe System:

The very 1<sup>st</sup> step after the description of system is how to design the describe system. It includes:

- Design Specification
- Design Simulation
- Design Synthesis

### Hardware Description Language:

A **hardware description language (HDL)** is a specialized computer language used to describe the structure and behavior of electronic circuits, and most commonly, digital logic circuits.

A hardware description language looks like a programming language such as C; it is a textual description consisting of expressions, statements and control structures. One important difference between most programming languages and HDLs is that HDLs explicitly include the notion of time.

The functional working of HDL is parallel way.

### The Role of HDL :

The language helps to describe any digital circuit in the form of structural, behavioral and gate level and it is found to be an excellent programming language for FPGAs and CPLDs.

Thus it has following roles:

- Behavioral
- Structural
- Physical

### Design Methodologies & Types of HDL:

There are two types of design methods:

Top Down

Down Top

These are mainly based on Hierarchical Rank.

Here are mainly two types of Hardware Description Languages which are standardized by IEEE, those are as follows:

- VHDL/VHSIC HDL (Very High Speed Integrated Circuits Hardware Description Language), is discovered by US Department of Defense
- Verilog HDL, discovered by Open Verilog International.

### Verilog HDL vs. VHDL:

Why to learn Verilog HDL instead of VHDL?

- Verilog HDL gives better low end than VHDL
- It is more modelling language.

VHDL has separate input & output blocks whereas in Verilog HDL has both input & output in the same block.

## **5. Verilog HDL and Its History**

**History:** Verilog HDL was invented by Phil Moor by and Prabhu Goel around 1984. It served as a proprietary hardware modeling language owned by Gateway Design Automation Inc. At that time, the language was not standardized. It modified itself in almost all the revisions that came out between 1984 to 1990.

## VERILOG VERSUS VHDL

VERILOG	VHDL
An HDL used to model electronic systems	An HDL used in electronic design automation to describe digital and mixed-signal systems such as field programmable gate arrays and integrated circuits
Based on C language	Based on Ada and Pascal languages
Case sensitive	Not case sensitive
A newer language than VHDL	Older than Verilog
Less complex	More complex
	Visit <a href="http://www.PEDIAA.com">www.PEDIAA.com</a>

Fig:: Difference between VHDL and Verilog

### 6. Verilog Module

**Definition:** Verilog, standardized as **IEEE 1364**, is a hardware description language (HDL) used to model electronic systems.

**Use:** It is most commonly used in the design and verification of digital circuits at the register-transfer level of abstraction. It is also used in the verification of analog circuits and mixed-signal circuits, as well as in the design of genetic circuits.

**Features:** It is case sensitive & parallel program compiling function.

#### Verilog Data Types in Details:

There are primarily two data types:

- Nets
- Registers (Integer, Real & Timer)

**Nets:** The internal connections of a block diagram except for input & output are called nets. Nets are represented as wires.

**Registers:** The function of registers is storing data & showing the result until next input is selected, such as integers, real & timer etc.

- **Integers:** Integers have a default width of 32 bits. These are declared by keyword 'integer'.
- **Real:** Real number, constants & variables are declared using keyword 'real'.

- **Time:** A special time register data type is used in Verilog to store simulation time.
- **Arrays:** These are allowed for reg, integer & time, not allowed for real variables.
- **Strings:** Can be stored in reg. Each character in string requires 8 bits of storage.

### Operators, Procedural Constructs & Loop Statements:

**Operators:** The operators are same as 'C' programming operators as shown in figure below

1	() [] -> . :	Grouping, scope, array/member access
2	! ~ - + * & sizeof type cast ++x --x	(most) unary operations, sizeof and type casts
3	* / %	Multiplication, division, modulo
4	+ -	Addition and subtraction
5	<< >>	Bitwise shift left and right
6	< <= > >=	Comparisons: less-than, ...
7	== !=	Comparisons: equal and not equal
8	&	Bitwise AND
9	^	Bitwise exclusive OR
10		Bitwise inclusive (normal) OR
11	&&	Logical AND
12		Logical OR
13	?:	Conditional expression (ternary operator)
14	= += -= *= /= %= &=  = ^= <<= >>=	Assignment operators
15	,	Comma operator

#### • **Procedural Constructs:**

- Initial Statement (Evaluate only once)
- Always Statement (Evaluate in a loop manner)

#### • **Loop Statement:**

- Repeat
- While
- For

### Description & Test Benches:

A module represents a design unit that implements specific behavioural characteristics and will get converted into a digital circuit during synthesis.

Any combination of inputs can be given to the module, and it will provide a corresponding output. It allows the same **module** to be reused to form more significant modules that implement more complex hardware.

## Hardware Schematic

Instead of building up smaller blocks to form bigger design blocks, the reverse process can also be done.

Consider the breakdown of a simple GPU engine into smaller components such that each can be represented as a module that implements a specific feature.

```
module <name> ([port_list]);  
    // Contents of the module  
endmodule  
  
// A module can have an empty portlist  
module name;  
    // Contents of the module  
endmodule
```

ii. **Test Benches:** Implements single model for many input without writing manually.

### Verilog Modelling in Details:

There are mainly three types of modelling in Verilog HDL as follows:

- Gate level modelling (Logic Gates)
- Data Flow modelling (Assign Boolean expressions)
- Behavioral modelling (Result)

## Development Process

Fig: Development and Synthesis Process

## 7. Main points to remember & some tips for Verilog HDL Coding

### Main points to remember:

Verilog is concurrent.

Think while writing the program - plan for requirement.

Blocking & Unblocking Code.

Tips:Don'ts	Does
Don'tWrite'C'code Thinkhardware,notalgorithm Verilog is inherently parallel, Compilersdon'tmapalgorithmtocircuit.	Dodescribehardwarecircuits Firstdrawadataflowdiagram Then start coding

## 8. Conclusion:

The session was concluded with some questions and answers & practical coding example in computer. I asked different questions to Padmanaban K. sir about Verilog coding's and sir cleared all the doubt with satisfactory answers.

### Question & Answer (QNA) Session:

i). What is done for reducing very large circuit transistor?

Answer: The channel length is reduced.

ii). Question: Is the 'Always' statement has same worked as any other loop?

Answer: Yes, it is similar to 'for', 'while' & 'do while' loop. But the main thing to be kept in mind is conditions.

iii). Question: Which style of Verilog coding is being used the most?

Answer: There is nothing a particular style like structural, dataflow or behavioral style is used, for any specification the mixed of any of these three are used.

### Practical example on computer:

A half adder module coding was shown in three different coding styles practically and its output. The codes are as follows:

```

moduleHalf_adder(a,b,sum,carry)

//DataFlowStyle
input a,b;
outputsum, carry;

assign sum =a^b;
assigncarry =a&b;

//StructuralStyle
xor(sum,a,b);
and(carry,a,b);

//Behavioral Style
if a='0';
b='0';
then sum=0;
carry=0;
else
sum=1;
carry=0;

```

## 9. Experience from the Work shop.

It was an informative, interesting and a successful workshop session. As a student of Computer & Communication Engineering, we understood the importance of Verilog HDL within Two days. I Express my thanks to Mr.Padmanaban K.who spent his valuable time for us. We also thank you to our respected Principal sir,HOD madam and our Managementfor arranging such an informative program. Finally, I would like to thank full to my colleagues and our students to make this work shop very successful.

**Date of Conduction:** 21<sup>st</sup> December 2023

**Venue:** KSIT Seminar Hall, Ground Floor

**Time:** 10.30AM – 12.00PM

**Duration:** 1.30Hours

**Sponsoring Bodies / Associating Organization:** NA

### *Expert Details – with photo*

**Name:** Shri. R. Anantharaman

**Designation:** Senior Advisor; Founder & CEO

**Organization:** Arthur D Little India & Scalepro Bengaluru

### **Brief Profile about the Expert:**

**Shri. R. Anantharaman**, currently working as Senior Advisor at Arthur D Little India; and Founder & CEO - Scalepro Bengaluru. He has 32 years of remarkable leadership experience in P/L Management, Revenue enhancement, Sales & Distribution management, Marketing, Human Resource, Supply Chain, Finance, Legal, and Customer Services. In the telecom and academic industries, he has 24 years of experience, which allowed him to be at the forefront of introducing next-generation technologies since the early days of the telecom revolution in India. Additionally, he has actively participated in various process and quality improvement efforts, such as ISO certification, Six Sigma implementation, and Quality councils. Furthermore, He possess over three years of experience in academic initiatives, including entrepreneurship skilling and education for students and faculty members, livelihood development programs for women, Self Help Groups, and unemployed youths.

### **Description of the Event:**

Disruptive technology is an innovation that significantly alters the way that consumers, industries, or businesses operate. It displaces a well-established product or technology, creating a new industry or market. One of the key features of disruptive technology is its ability to offer consumers new and notable benefits. Even a startup with limited resources can aim at technology disruption by inventing an entirely new way of getting something done. Established companies tend to focus on what they do best and pursue incremental improvements rather than revolutionary changes. They cater to their largest and most demanding customers. Some examples of disruptive technologies include Block chain Technology, Artificial Intelligence (AI), 5G Technologies, Internet of Things (IoT), Drone Technology, 3D Printing, e-commerce, GPS system and many more.

In order to understand the role and benefits of disruptive innovations in entrepreneurship journey of students, Industry Institute Interaction Cell (IIIC) in association with Department of CCE & CSE (ICB) organized an expert talk on the said title for 3<sup>rd</sup> semester students on 21<sup>st</sup> December 2023 at seminar Hall, KSIT. As per the directions of Head, Department of CCE & CSE (ICB), 3<sup>rd</sup> Semester students assembled in seminar hall at 10.25AM. The program started with welcoming the industry expert Shri. R. Anantharaman with a bouquet by Dr. Dilip Kumar K, Principal-KSIT. Mr. Rajesh G.L, Chief coordinator – IIIC outlined the meaning of disruptive technology with examples. Industry expert briefed about key features of disruptive innovation and its ability to offer consumers new and notable benefits. He also explained disruptive technologies including Block chain Technology, Artificial Intelligence (AI), 5G Technologies, Internet of Things (IoT), Drone Technology, 3D Printing, e-commerce, GPS system and many more. Further, program ended with vote of thanks by Mr. Rajesh G.L at 12.00PM.

**Objectives / Key Highlights:**

- Understand the role and benefits of disruptive innovations in young minds.
- Explore different types of disruptive technologies and its applications

**Participant details - No. of Participants: 94**

### “ON Beyond Wires And Waves -Internet Communication & Networking Protocols Demystified “

**Date of conduction: 11 January 2024**

**Venue: KSIT Conference hall, Ground Floor**

**Time: 10:30AM - 12:30 PM**

**Duration: 2 Hours**

**Name:** Mr.Akhil Mohan

**Designation:** Solution Architect

**IT Organisation :** Akamai Technologies

**Brief Profile about the Expert:**

**Mr.Akhil Mohan**, is a Telecommunications Engineer (2013 batch), graduated from KSIT, Bangalore. Akhil is currently working as **Solution Architect** at Akamai Technologies, a leading CDN company. He is an **AWS Certified Solutions Architect Professional**, **Google Certified Professional Cloud Architect**, and **Cisco Certified Network Associate (CCNA)**.

Being an active individual who has a craving for innovation, he has participated and won multiple national level and state level awards during his engineering days. He was awarded the first place in state level for his innovative idea on a device which can write on air. Teaching is his passion and Physics and Cloud Computing is his subject of interest. He has taught JEE-Physics for 11th and

12th standard students at Christ PU college and MCC PU college in Bangalore. He follows Indian economy, and Finance.

### **Description of the Event:**

The internet is not really radio waves, even though it can be carried that way. If you happen to have internet through a microwave service, then that is in fact the way you receive it. The way most people get internet is through cable. Cable does have a single wire running down the middle of it that carries the radio signal that encodes the bits that comprise what we know of as the Internet. You know it comes in as a radio wave because you need a modem to see it. A modem is a radio device that modulates and demodulates the radio waves that carries the TCP IP signal that our computer interprets for us as the Internet. The fact that a lot of information can be carried on that small wire is just a fact of physics. The higher the frequency radio wave you use, the more information you can cram into it. Light waves are much higher frequency than radio waves, and once we all get fiber to our homes we will be amazed at how fast it is. Those optical fibers are hair-thin, but again, it's just a matter of wavelength that gives it that power to carry information.

A network protocol is a set of established rules that specify how to format, send and receive data so that computer network endpoints, including computers, servers, routers and virtual machines, can communicate despite differences in their underlying infrastructures, designs or standards.

The Entrepreneurship and Innovation Talk was held on June 22nd, 2024, from 11:00 AM to 1:00 PM at the Conference Hall of K S Institute of Technology. The event featured Mr. Manikumar Lakkaraju, a renowned Startup Mentor, Serial Entrepreneur, and NoCode Specialist, as the keynote speaker.

This insightful talk was organized by the Department of Computer Science & Engineering in association with the Entrepreneurship Development Cell & Computer Society of India.

### *Glimpses of Inauguration*

**Significance and Impact of the Program :** The Entrepreneurship and Innovation Workshop aimed to foster a culture of innovation and practical problem-solving among students. With a special focus on NoCode platforms, the event provided students with insights into modern entrepreneurial strategies that minimize traditional barriers to software development and business creation. The presence of an accomplished entrepreneur like Mr. Manikumar Lakkaraju significantly enhanced the learning experience, offering students real-world insights into the startup ecosystem.

### **Student Benefits:**

- **Exposure to Entrepreneurial Practices:** Students gained first-hand knowledge about launching and managing start-ups from a seasoned entrepreneur.
- **Skill Development in NoCode Tools:** The workshop introduced students to NoCode platforms, empowering them to build software solutions without extensive programming knowledge.
- **Networking Opportunities:** Interaction with the speaker and other participants provided valuable networking opportunities, crucial for career and entrepreneurial pursuits.

*Glimpse during the presentation on “Innovation with Nocode and Lowcode*

**Conclusion:**

The Entrepreneurship and Innovation talk successfully achieved its goal of inspiring students and equipping them with the tools and knowledge necessary to venture into entrepreneurship. Continuing this series will further enhance the entrepreneurial capabilities of students at K S Institute of Technology.

EO#	EVENT OUTCOMES
EO1	Students acquired an enhanced understanding of entrepreneurial practices through direct insights from an experienced entrepreneur.
EO2	Participants gained proficiency in NoCode software development, empowering them to build applications without extensive coding knowledge.
EO3	The event facilitated networking opportunities, fostering professional growth and potential collaborative ventures among students.

### A REPORT ON SKILL DEVELOPMENT TRAINING AND PROJECT EXHIBITION”

<b>Semester/ Section:</b>	5 <sup>th</sup> Semester / A & B
<b>Event Type:</b>	Technical Training & Project Exhibition
<b>Event Name:</b>	SKILL DEVELOPMENT TRAINING ON IOT EDGE & GATEWAY AND PROJECT EXHIBITION
<b>Date/Duration:</b>	26 <sup>th</sup> October 2023 to 20 <sup>th</sup> November2023 / 25 days 1 <sup>st</sup> December 2023 / 1 Day
<b>Industry Collaboration for training</b>	Cranes Varsity Software
<b>No. of Students:</b>	128
<b>Online link/Offline:</b>	Offline

#### Event Objectives:

- An Introduction to components involved in Computation through IOT.
- Addressing and identifying various Projects using OOPs and IOT.
- Emphasizing on Practical / Physical models using IOT and implement.
- Addressing the social issues and the key points to evolve in the current Industry requirements.

#### Speaker Details:

**Ms. Bhavani Sankari**

**Domain Expert, Corporate Trainer for Data Science and IoT**

#### Expertise:

- 5+ years of Strong technical expertise in consulting and training.
- Expert in Data Science, Python, Machine Learning, Data Analysis and Visualization, Deep learning, and IoT
- 3500+ Man hours of training experience.
- Successfully trained 1000+ engineering graduates and working professionals

in Linux and IoT

- Proficient in working on RaspberryPi, Arduino, Microcontrollers, IoT, Linux, and Device Drivers.
- Successful Training Delivered on
- Basic and Advanced Level Python Programming
- Python Unit Testing
- IoT Edge Node & Gateway
- Linux and device drivers etc

**Kanchana H, M.Tech (Ph.D)**

**Domain Expert, Corporate Trainer for Embedded and VLSI Design**

#### Professional Summary:

- Overall, 6+ Years of experience in retail & corporate training.
- Proven expertise in delivering training to diversified audiences C, C++, Python, Embedded C , Verilog HDL and FPGA Design.
- Trained 5000+ audiences from diversified groups including freshers, working professionals and corporate clients.
- More than 12,000 man-hours of training on various technologies.

#### Technical Skills:

- Programming Languages: C, C++, Python, Embedded C, Verilog HDL
- FPGA: Spartan-2, Spartan-3, Spartan-6, Artix-7
- Embedded protocols: UART, SPI, I2C and others

#### **Mohsin Khan A, M.Tech (PhD)**

#### **Domain Expert, Corporate Trainer for Embedded and VLSI**

- Over 14 plus years of Training & IT experience
- C, C++, Python, Embedded C, ARM Microcontroller, RTOS, MATLAB & Simulink, CAPL Scripting CANoe, Verilog/VHDL, FPGA, System Verilog, UVM.

- Demonstrated expertise in Embedded System and Automotive

- VLSI design and verification

- Programming Languages: C, C++, Python, CAPL, Embedded C,

MATLAB, Verilog/VHDL, System Verilog

- 25,000+ Man hours training experience.
- Preferred trainer for EMBEDDED & VLSI.
- Trained over 2000+ engineers at Student Level and has trained over 200+ engineers at Corporate Level.
- Provided several workshops with hands-on lab sessions for various corporate training programs.

#### **Mr. Nishanth T**

#### **Domain Expert, Corporate Trainer**

#### **Areas of expertise**

- Delivered 5000+ Manhours Training
- Programming Languages: Python, Basic knowledge on c & shell scripting
- IDE: Arduino, Python DILE, spyder, Google colab and code block
- Linux OS: Ubuntu, centOS, Redhat and MacOS

#### **Technical Skills**

- Expert in Raspberry Pi Training.
- Experience in MariaDB
- Experience in C, Python, and Embedded Systems.
- IOT, Arduino Microcontroller, Embedded c & Robotics
- Red Hat Enterprise Linux, CentOS, and Ubuntu.
- Configuring the crontab to automate the tasks.
- Creating and maintaining YUM/APT/GIT repositories.
- Bash Scripting
- User administration and managing file permission and ACL.
- Setting up Web Servers (httpd).
- Experience in Configuring and Maintaining various Open-Source applications on Linux - NFS, Autofs, SCP, SFTP, httpd.

### **Reddyrani. N, (BTech)**

#### **Corporate Trainer for Embedded and Automotive**

##### **Professional Summary:**

- Overall, 3+ Years of experience in retail & corporate training.
- Proven expertise in delivering training to diversified audiences C, Python, Embedded C , IOT, ARM.
- Trained 500+ audiences from diversified groups including freshers, working professionals and corporate clients.
- More than 5000 man-hours of training on various technologies.

##### **Technical Skills:**

- Programming Languages: C, Python, Embedded C
- Embedded protocols: UART, SPI, I2C and others

### **Mr. Shaik Imam**

#### **Domain Expert, Corporate Trainer**

##### **Areas of expertise**

- Over 15 years of Training & IT experience
- Microprocessors, Microcontrollers, ARM, Embedded C, VLSI and IOT

##### **Technical Skills**

- Programming Languages: C, C++, ASM, Embedded C for ARM, Verilog, VHDL, System Verilog.
- Embedded System Development using high end Microcontrollers STM32.
- VLSI design and verification using Verilog/System Verilog
- Python Programming for IOT applications
- Programming in C following MISRA-C guidelines
- Programming in C++ 11/14
- 25,000+ Man hours training experience.
- Preferred trainer for Embedded and VLSI
- Trained over 2500+ engineers at Student Level and has trained over 300+ engineers at Corporate Level.
- Conducted several workshops with hands-on lab sessions for various corporate training programs.

### **Mr. T S Tejas**

#### **Domain Expert, Corporate Trainer**

##### **Professional Summary:**

- Overall, 4 Years of experience in retail & corporate training at cranes varsity.
- Proven expertise in delivering training to diversified audiences on C.
- Trained 1000+ audiences from diversified groups including students and corporate from junior engineers to project leads.
- Handled internships at various colleges for the engineering students
- Handled corporate trainings for companies like UST GLOBAL,PCC

##### **CONTROLS**

- Trusted Trainer for C Programming trainer for fresh graduates and working professionals
- Cohesive team worker, having strong analytical, problem-solving and interpersonal skills.

##### **Technical Skills:**

- Programming Languages / OS: C, Linux System Programming, and Data structures

**Ms. Zaiba Afreen**  
**Domain Expert, Corporate Trainer**

**Areas of expertise**

- Trainer with Over 4+ Years of experience retail & corporate training at cranes varsity.
- Proven expertise in delivering training to diversified audiences on HTML, CSS, JAVASCRIPT Programming, ANGULAR JS AND MONOGO DB
- Trained 1000+ audiences from diversified groups including students and graduates and corporates
- Trusted Trainer for Web Technology, Angular Js and Mongo DB
- Cohesive team worker, having strong analytical, problem-solving and interpersonal skills.

**Technical Skills**

- Programming Languages : HTML, CSS, JAVASCRIPT, ANGULAR JS AND MONGODB

## Event description with pictures:

During the enriching internship at KSIT by Cranes Varsity, spanning from 26<sup>th</sup> October 2023 to 20<sup>th</sup> November 2023, students delved into a myriad of new concepts in Python and the Internet of Things (IoT). Over the course of this one-month program, their focus in Python covered a diverse range of topics, including linear search, binary search, pattern programs, object-oriented programming (OOP) concepts, nested classes, method utilization, and object creation.

Additionally in Python, students explored functions, lists, tuples, data types, decorators, dictionaries, and operator overloading. The comprehensive curriculum was reinforced by both pre-assessment and post-assessment tests, showcasing significant progress in knowledge development and problem-solving skills in Python. The internship wasn't limited to Python alone; there was a significant emphasis on IOT. Dedicated classes were conducted where each student team received an IOT devices kit.

In IOT kit each instructors elucidated the importance of each component, clarifying doubts and covering a spectrum of IOT concepts. Notable areas of focus included rotating servo motor applications, gas sensor-based smoke detection, water pumping using relays, LED illumination with ESP32, text display on LCD, soil moisture sensor for moisture content detection, applications of the RFID module and so on

To enhance practical understanding, an exhibition was organized, allowing students to showcase their IOT projects. Each team received a comprehensive IOT kit consisting of around 26 devices, and they were given 16 days of training with an additional 7-day period to develop their own IOT projects. The results were remarkable, with diverse projects ranging from Home Automation to Smart Agricultural Irrigation covering all the social sectors.

The post-assessment tests, featuring both theoretical and skill-based questions, reflected the students' thorough understanding of the topics covered, inspiring the faculty to delve deeper into teaching advanced skills. Though challenging yet rewarding nature of the internship empowered students to think creatively and implement their newfound knowledge. This hands-on experience not only enhanced their technological prowess but also instilled a greater sense of confidence.

The positive overall experience highlights the potential for these acquired skills to be instrumental in shaping the students' future careers in the field of technology. From the excitement on day one to the culmination in the exhibition, the journey was a testament to the valuable learning experiences gained during this internship.

All placement coordinators are requested to submit the consolidated attendance of all 4 days to Placement Department and to take the feedback for all the days

**NOTE:**

- All the students are informed to attend the session compulsorily in Placement Dress code ONLY (Solid White Shirt and Black trousers).
- Students are strictly informed to be present in their allocated rooms only for all the four days. DO NOT SWAP THE BATCHES.
- Feedback QR code will be displayed in all the training rooms. Students are informed to provide the feedback for each session before leaving the class.

### “Disruptive technologies shaping the future”

**Date of Conduction:** 21<sup>st</sup> December 2023

**Venue:** KSIT Seminar Hall, Ground Floor

**Time:** 10.30AM – 12.00PM

**Duration:** 1.30Hours

**Sponsoring Bodies / Associating Organization:** NA

#### *Expert Details – with photo*

**Name:** Shri. R. Anantharaman

**Designation:** Senior Advisor; Founder & CEO

**Organization:** Arthur D Little India & Scalepro Bengaluru

#### **Brief Profile about the Expert:**

**Shri. R. Anantharaman**, currently working as Senior Advisor at Arthur D Little India; and Founder & CEO - Scalepro Bengaluru. He has 32 years of remarkable leadership experience in P/L Management, Revenue enhancement, Sales & Distribution management, Marketing, Human Resource, Supply Chain, Finance, Legal, and Customer Services. In the telecom and academic industries, he has 24 years of experience, which allowed him to be at the forefront of introducing next-generation technologies since the early days of the telecom revolution in India. Additionally, he has actively participated in various process and quality improvement efforts, such as ISO certification, Six Sigma implementation, and Quality councils. Furthermore, He possess over three years of experience in academic initiatives, including entrepreneurship skilling and education for students and faculty members, livelihood development programs for women, Self Help Groups, and unemployed youths.

#### **Description of the Event:**

Disruptive technology is an innovation that significantly alters the way that consumers, industries, or businesses operate. It displaces a well-established product or technology, creating a new industry or market. One of the key features of disruptive technology is its ability to offer consumers new and notable benefits. Even a startup with limited resources can aim at technology disruption by inventing an entirely new way of getting something done. Established companies tend to focus on what they do best and pursue incremental improvements rather than revolutionary changes. They cater to their largest and most demanding customers. Some examples of disruptive technologies include Block chain Technology, Artificial Intelligence (AI), 5G Technologies, Internet of Things (IoT), Drone Technology, 3D Printing, e-commerce, GPS system and many more.

In order to understand the role and benefits of disruptive innovations in entrepreneurship journey of students, Industry Institute Interaction Cell (IIIC) in association with Department of CCE & CSE (ICB) organized an expert talk on the said title for 3<sup>rd</sup> semester students on 21<sup>st</sup> December 2023 at seminar Hall, KSIT. As per the directions of Head, Department of CCE & CSE (ICB), 3<sup>rd</sup> Semester students assembled in seminar hall at 10.25AM. The program started with welcoming the industry expert Shri. R. Anantharaman with a bouquet by Dr. Dilip Kumar K, Principal-KSIT. Mr. Rajesh G.L, Chief coordinator – IIIC outlined the meaning of disruptive technology with examples. Industry expert briefed about key features of disruptive innovation and its ability to offer consumers new and notable benefits. He also explained disruptive technologies including Block chain Technology, Artificial Intelligence (AI), 5G Technologies, Internet of Things (IoT), Drone Technology, 3D Printing, e-commerce, GPS system and many more. Further, program ended with vote of thanks by Mr. Rajesh G.L at 12.00PM.

### Objectives / Key Highlights:

- Understand the role and benefits of disruptive innovations in young minds.
- Explore different types of disruptive technologies and its applications

**Participant details - No. of Participants: 94**  
**Students (internal/external): Internal (CCE – 46; CSE ICB – 48)**  
**Faculty: Prof. Rachana, Asst. Prof. CSE (ICB) & Prof. Shashikala, CCE**

**Prof. Kushal Kumar B N** is a Associate Professor in CSE (ICB) department having 14 years of experience in teaching and his research interests are Machine Learning, IoT.

## **DESCRIPTION OF THE EVENT**

The main Objective of the workshop is to provide basic knowledge about Machine Learning, Image Processing, its applications in real life and also advantages of the both trending technologies. First Day, Introduction to Machine Learning, its applications, advantages were discussed along with the hands-on sessions using Python and also to visualize the data using Python Visualization tools.

Second Day, Introduction to Image processing, its applications, application areas, challenges were discussed. Hands on session was conducted to read, write and manipulated the images, display images in RGB formats and also to flip the image using opencv software.

### **OBJECTIVES / KEY HIGHLIGHTS:**

Key Highlights:

1. Students gained basic understanding of Machine Learning and Image Processing.
2. Students learnt to use Python data visualization to visualize the data
3. Students gained the knowledge the Python sklearn Machine Learning library, OpenCV Python Image processing tool.

**Date of Conduction: 26<sup>th</sup> May 2024**

**Venue: KSIT Seminar Hall, Ground Floor**

**Time: 09.00AM – 04.00PM**

**Duration: 6 Hours**

**Sponsoring Bodies / Associating Organization: Karnataka State Council for Science & Technology (KSCST), IISc Campus, Bengaluru.**

*Expert Details – with photo*

**Name: Mr. Nagarjun M.G**

**Designation: Project Associate**

**Organization: KSCST, IISc Campus, Bengaluru**

**Brief Profile about the Expert:**

Mr. Nagarjun M G is currently working as project associate at Karnataka State Council for Science and Technology (KSCST), IISc campus Bengaluru. He completed his graduation in mechanical stream from K S Institute of Technology, Bengaluru and Post-graduation in the stream of Manufacturing science and engineering Siddaganga Institute of Technology, Tumkur.

He participated as well delivered lectures in many faculty developments programs, workshops on IPRs and Biofuels. At council, He was mentored the Bioenergy research & demonstrations centres (BRIDCs) established by Kamataka State Bioenergy Development Board (KSBDB) in all 30 districts in terms of technical & administrative roles. He was also coordinated the projects of Student project programme (biofuel projects), kitchen garden development in chamarajanagar district (funded by DST Vigyan prasara), Glycerol project of NDRI (funded by DST Gol), used cooking oil (UCO) Survey in Bengaluru city etc.

At Patent Information Centre (PIC) and Technology and Innovation Support Centre – TISC, WIPO of KSCST he follows up all the Information Education & Communication activities of PIC including IP filings i.e patents, copyrights, trademarks, designs, Establishment of IP Cells, Institutional Policymaking, visitor consultations and other projects and programmes of the Patent Information center. He is coordinator of Technology Innovation Support Center – WIPO (TISC) of KSCST and the coordinator of KIRAN IPR programme of DST & TIFAC where the programme provides on job training on IPR for selected women candidates under this scheme at KSCST.

#### **Description of the Event:**

Intellectual property rights (IPR) refers to the legal rights given to the inventor or creator to protect his invention or creation for a certain period of time. IP protection can be sought for a variety of intellectual efforts including Patents, Industrial designs, Trademarks, Copyright and Geographical indications. IPR protection gives business a competitive advantage over other similar businesses and also it prevent unauthorized use of your intellectual property and works. It enhances the value of your company and also opens avenues for collaborations and opportunities for generating income such as by entering into licensing agreements to exploit/work the invention/work.

The inaugural function started at 9.00am by welcoming the chief guest and resource person Mr. Nagarjun M.G, Project Associate, KSCST with a bouquet by Dr. K.V.A Balaji, CEO, KSGI and Dr. Dilip Kumar K, Principal & Director, KSIT. Prof. Rajesh G.L, IP Coordinator briefed about the role of IPR in encouraging innovation and creativity and introduced the eminent speaker to the gathering. Mr. Nagarjun M G outlined IP management systems for startups with case studies to the gathering. The function ended with vote of thanks by Prof. Rajesh G.L at 9.35AM.

#### **Session – 1: Introduction to IPR \_ 09:35AM to 11.30AM**

In the session -1, resource person discussed the types of intellectual property rights with case studies. He described patent filing process and its eligibility along with copyrights and trademarks. Few interesting topics such as; how to convert innovative idea to business model, initial steps for filing a patent and design considerations etc. were explained and interacted with students.

#### **Session – 2: Patent filing and protection of idea through patents \_ 11:45AM to 01.45PM**

Mr. Nagarjun explored students on filing a patent with an example. He demonstrated entire filing process with the students and briefed about novelty search and prior art search. Students showed interest and interacted with speaker on conversion of innovative idea into business/startups.

#### **Session – 3: IP Management for startups \_ 02:00PM to 04.00PM**

At the beginning of session -3, Prof. Rajesh G.L, IP cell coordinator conducted quiz on IPR and patent filing process for participants. Upon quiz activity, resource person explained the role of IP management towards establishment of new startups. He illustrated IP tools and techniques which aids in enhancing entrepreneurship skills of an individual. The program ended with vote of thanks by Prof. Rajesh G.L, Coordinator, KSIT IP Cell at 4.00PM.

#### **Objectives / Key Highlights:**

- Understand IP tools & techniques to convert idea into business.
- Explore on patent filing process and IP management.
